IGESL Solar O&M Services Private Limited (Earlier Known as Ripudaman Urja Private Limited)
Notes to the financial statements for the year ended 31 March 2026

1. Company information

IGESL Solar O&M Services Private Limited (Earlier Known as Ripudaman Urja Private Limited) (the "Company") incorporated on 28 April 2017 under the Companies Act, 2013 and is proposed to engage in the business of generation and sale of wind energy. The Company is a wholly owned subsidiary of Inox Green Energy Services Limited (earlier known as Inox Wind Infrastructure Services Limited (IWISL)) which is a subsidiary of Inox Wind Limited (IWL) and its ultimate holding company is Inox Leasing and Finance Limited.
The Company is yet to commence its commercial operations. The Company's registered office is located at 301, ABS Tower Old Padra Road, Vadodara, Gujarat, India.

2. Statement of compliance and basis of preparation and presentation

2.1 Statement of Compliance

These financial statements of the Company comply in all material aspects with the Indian Accounting Standards ("Ind AS") notified under section 133 of the Companies Act, 2013 ("the Act") and other relevant provisions of the Act.

2.2 Basis of Measurement

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakh, unless otherwise indicated.

These financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the significant accounting policies.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.3 Basis of Preparation and Presentation

The financial statements have been prepared on accrual and going concern basis.

Any asset or liability is classified as current if it satisfies any of the following conditions:

- the asset/liability is expected to be realized/settled in the Company's normal operating cycle;
- the asset is intended for sale or consumption;
- the asset/liability is held primarily for the purpose of trading;
- the asset/liability is expected to be realized/settled within twelve months after the reporting period
- the asset is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date;
- in the case of a liability, the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

All other assets and liabilities are classified as non-current.

For the purpose of current/non-current classification of assets and liabilities, the Company has ascertained its normal operating cycle as twelve months.

These financial statements were authorized for issue by the Company's Board of Directors on 28th May 2026.

3. Material Accounting Policies

3.1 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable and is recognized when it is probable that the economic benefits associated with the transaction will flow to the company and the amount of income can be measured reliably. Revenue is reduced for rebates, trade discounts, refunds and other similar allowances. Revenue is net of goods & services tax, sales tax, value added tax and other similar taxes.

3.1.1 Other Income

Interest Income from a financial asset is recognized on time basis, by reference to the principal outstanding at the effective interest rate applicable, which is the rate which exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3.2 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

3.3 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

3.3.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years, items that are never taxable or deductible and tax incentives. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3.3.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3.3.3 Presentation of current and deferred tax :

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. In case of deferred tax assets and deferred tax liabilities, the same are offset if the Company has a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

3.4 Property, Plant and Equipment

An item of Property, plant and equipment (PPE) that qualifies as an asset is measured on initial recognition at cost. Following initial recognition, property, plant and equipment are carried at cost, as reduced by accumulated depreciation and impairment losses, if any.

The Company identifies and determines cost of each part of an item of property, plant and equipment separately, if the part has a cost which is significant to the total cost of that item of property, plant and equipment and has useful life that is materially different from that of the remaining item.

Cost comprises of purchase price / cost of construction, including non-refundable taxes or levies and any expenses attributable to bring the PPE to its working condition for its intended use. Project pre-operative expenses and expenditure incurred during construction period are capitalized to various eligible PPE. Borrowing costs directly attributable to acquisition or construction of qualifying PPE are capitalized. In respect of accounting period commencing on or after 1 April 2011, the cost of depreciable capital assets includes foreign exchange differences arising on translation of long term foreign currency monetary items recognized in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period as per the previous GAAP.

Spare parts, stand-by equipment and servicing equipment that meet the definition of property, plant and equipment are capitalized at cost and depreciated over their useful life. Costs in nature of repairs and maintenance are recognized in the Statement of Profit and Loss as and when incurred.

Cost of assets not ready for intended use, as on the Balance Sheet date, is shown as capital work in progress. Advances given towards acquisition of property, plant and equipment outstanding at each Balance Sheet date are disclosed as Other Non-Current Assets.

Depreciation is recognized so as to write off the cost of PPE (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The useful lives prescribed in Schedule II to the Companies Act, 2013 are considered as the minimum lives. If the management's estimate of the useful life of property, plant and equipment at the time of acquisition of the asset or of the remaining useful life on a subsequent review is shorter than that envisaged in the aforesaid schedule, depreciation is provided at a higher rate based on the management's estimate of the useful life/remaining useful life. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

PPE are depreciated over its estimated useful lives, determined as under:

- Freehold land is not depreciated.

- On other items of PPE, on the basis of useful life as per Part C of Schedule II to the Companies Act, 2013.

The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from its use or disposal. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

3.5 Impairment of tangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified. Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If it is not possible to measure fair value less cost of disposal because there is no basis for making a reliable estimate of the price at which an orderly transaction to sell the asset would take place between market participants at the measurement dates under market conditions, the asset's value in use is used as recoverable amount.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

3.6 Leasing

Effective April 1, 2019, The Company has adopted Ind AS 116 "Lease" effective from April 01, 2019 and considered all material lease contracts existing on April 01, 2019. The adoption of the standard does not have any material impact on the financial statement of the Company.

Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments

3.6.1 The Company as lessee

As all lease agreements entered into by the company are for less than 12 months i.e. short term in nature. Therefore, the Company has availed exemption from accounting as prescribed by Ind AS - 116. Consequently, Company recognizes lease rental in profit or loss statement on a straight-line basis over the term of the lease

3.7 Provisions and contingencies

The Company recognizes provisions when a present obligation (legal or constructive) as a result of a past event exists and it is probable that an outflow of resources embodying economic benefits will be required to settle such obligation and the amount of such obligation can be reliably estimated.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not require an outflow of resources embodying economic benefits or the amount of such obligation cannot be measured reliably.

When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources embodying economic benefits is remote, no provision or disclosure is made.

3.8 Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

A] Financial assets

a) Initial recognition and measurement:

Financial assets are recognized when the Company becomes a party to the contractual provisions of the instrument. On initial recognition, a financial asset is recognized at fair value, in case of financial assets which are recognized at fair value through profit and loss (FVTPL), its transaction costs are recognized in the statement of profit and loss. In other cases, the transaction costs are attributed to the acquisition value of the financial asset.

b) Effective interest method:

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the "Other income" line item.

c) Subsequent measurement:

For subsequent measurement, the Company classifies a financial asset in accordance with the below criteria:
i. The Company's business model for managing the financial asset and
ii. The contractual cash flow characteristics of the financial asset.

Based on the above criteria, the Company classifies its financial assets into the following categories:

i. Financial assets measured at amortized cost:

A financial asset is measured at the amortized cost if both the following conditions are met:
a) The Company's business model objective for managing the financial asset is to hold financial assets in order to collect contractual cash flows, and
b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

This category applies to cash and bank balances of the Company. Such financial assets are subsequently measured at amortized cost using the effective interest method.

The amortized cost of a financial asset is also adjusted for loss allowance, if any.

ii. Financial assets measured at FVTOCI:

A financial asset is measured at FVTOCI if both of the following conditions are met:
a) The Company's business model objective for managing the financial asset is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in equity instruments classified under financial assets are initially measured at fair value. The Company may, on initial recognition, irrevocably elect to measure the same either at FVTOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis. Fair value changes on an equity instrument are recognized as other income in the Statement of Profit and Loss unless the Company has elected to measure such instrument at FVTOCI.

The Company does not have any financial assets in this category.

iii. Financial assets measured at FVTPL:

A financial asset is measured at FVTPL unless it is measured at amortized cost or at FVTOCI as explained above.
This is a residual category applied to all other investments of the Company excluding investments in subsidiaries, joint ventures and associate companies. Such financial assets are subsequently measured at fair value at each reporting date. Fair value changes are recognized in the Statement of Profit and Loss. Dividend income on the investments in equity instruments are recognized as 'other income' in the Statement of Profit and Loss.

The Company does not have any financial assets in this category.

d) Derecognition:

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized (i.e. removed from the Company's Balance Sheet) when any of the following occurs:

i. The contractual rights to cash flows from the financial asset expires;
ii. The Company transfers its contractual rights to receive cash flows of the financial asset and has substantially transferred all the risks and rewards of ownership of the financial asset;
iii. The Company retains the contractual rights to receive cash flows but assumes a contractual obligation to pay the cash flows without material delay to one or more recipients under a 'pass-through' arrangement (thereby substantially transferring all the risks and rewards of ownership of the financial asset);
iv. The Company neither transfers nor retains substantially all risk and rewards of ownership and does not retain control over the financial asset.

In cases where Company has neither transferred nor retained substantially all of the risks and rewards of the financial asset, but retains control of the financial asset, the Company continues to recognize such financial asset to the extent of its continuing involvement in the financial asset. In that case, the Company also recognizes an associated liability.

The financial asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset.

e) Impairment of financial assets:

The Company applies expected credit losses (ECL) model for measurement and recognition of loss allowance on the following:
i. Financial assets measured at amortized cost
ii. Financial assets measured at fair value through other comprehensive income (FVTOCI)

The Company does not have any trade receivables in this year.

In case of assets listed as (i) and (ii) above, the Company determines if there has been a significant increase in credit risk of the financial asset since initial recognition. If the credit risk of such assets has not increased significantly, an amount equal to 12-month ECL is measured and recognized as loss allowance. However, if credit risk has increased significantly, an amount equal to lifetime ECL is measured and recognized as loss allowance.

Subsequently, if the credit quality of the financial asset improves such that there is no longer a significant increase in credit risk since initial recognition, the Company reverts to recognizing impairment loss allowance based on 12-month ECL.

ECL is the difference between all contractual cash flows that are due to the entity in accordance with the contract and all the cash flows that the entity expects to receive, discounted at the original effective interest rate.

12-month ECL are a portion of the lifetime ECL which result from default events that are possible within 12 months from the reporting date. Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial asset.

ECL are measured in a manner that they reflect unbiased and probability weighted amounts determined by a range of outcomes, taking into account the time value of money and other reasonable information available as a result of past events, current conditions and forecasts of future economic conditions.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss under the head 'Other expenses' / 'Other income'.

B] Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

i. Equity instruments:-

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company member are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

ii. Financial Liabilities:-

a) Initial recognition and measurement :

Financial liabilities are recognized when the company becomes a party to the contractual provisions of the instrument. Financial liabilities are initially measured at fair value.

b) Subsequent measurement:

Financial liabilities are subsequently measured at amortised cost using the effective interest rate method. Financial liabilities carried at fair value through profit or loss are measured at fair value with all changes in fair value recognized in the Statement of Profit and Loss.

The Company has not designated any financial liability as at FVTPL.

c) Derecognition of financial liabilities:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid is recognized in the Statement of Profit and Loss.

3.9 Earnings Per Share

Basic earnings per share is computed by dividing the net profit or loss for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

3.10 Segment Reporting

The company is engaged in providing wind farm development services and also provides common infrastructure services and erection, procurement and commissioning services for WTGs which is the only business segment in terms of IND AS 108: Operating Segment. Further, all the activities of the company are in India and hence there is single geographical segment.

3.11 Critical accounting judgements and use of estimates

In application of Company's accounting policies, which are described in Note 3, the directors of the Company are required to make judgements, estimations and assumptions about the carrying value of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of revision or future periods if the revision affects both current and future periods.

The Company has not commenced its commercial operations upto 31 March 2026 and hence there are no significant judgements or estimates required to be made during the year.

Standard issued but not effective
The Ministry of Corporate Affairs (MCA), as part of India's continued convergence with IFRS, has initiated the process for introduction of Ind AS 118 – Presentation and Disclosure in Financial Statements, which is converged with IFRS 18 issued by the IASB in April 2024. Ind AS 118 is intended to replace Ind AS 1 (Presentation of Financial Statements) and focuses on improving how entities present and communicate financial performance, particularly in the Statement of Profit and Loss. This standard is proposed to be applicable for annual reporting periods beginning on or after 1 April 2027, subject to final notification by the MCA through amendment to the Companies (Indian Accounting Standards) Rules.

Recent Pronouncements
Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended March 31, 2026, MCA has notified the Companies (Indian Accounting Standards) Amendment Rules, 2025 applicable to the Company w.e.f. April 1, 2025.

(i) Amendments to Ind AS 21 - Lack of exchangeability
The amendment requires the Effects of Changes in Foreign Exchange Rates to specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows. The amendments are effective for annual reporting periods beginning on or after 1st April 2025. When applying the amendments, an entity cannot restate comparative information. The amendments do not have a material impact on the Company's financial statements.

(ii) Amendments to Ind AS 1 – Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants.
In August 2025, the MCA notified amendments to paragraphs 69 to 76 of Ind AS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify: y What is meant by a right to defer settlement y That a right to defer must exist at the end of the reporting period y That classification is unaffected by the likelihood that an entity will exercise its deferral right

y That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months. If there is a breach of a material covenant of a long term loan arrangement on or before the end of the reporting period, resulting in the liability becoming payable on demand as at the reporting date, and the lender agrees—after the reporting period but before the financial statements are approved for issue—not to demand repayment for at least 12 months as a consequence of the breach, this shall be treated as an adjusting event. Accordingly, the entity is not required to classify the liability as current. The amendments are effective for annual reporting periods beginning on or after 1st April 2025 retrospectively in accordance with Ind AS 8. The amendments have resulted in additional disclosure in the financial statements, refer Note 17A (vi) but not had an impact on the classification of Company's liabilities.

(iii) Amendments to Ind AS 7 and Ind AS 107 - Supplier Finance Arrangements
In August 2025, the MCA notified amendments to Ind AS 7 Statement of Cash Flows and Ind AS 107 Financial Instruments: Disclosures to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. As a result of implementing the amendments, the Company has provided additional disclosures about its supplier finance arrangement. Please refer to Note 17C.

(iv) International Tax Reform—Pillar Two Model Rules
Amendments to Ind AS 12 In August 2025, the MCA notified amendments to Ind AS 12 Income Taxes in response to the OECD's BEPS Pillar Two rules and include: y A mandatory temporary exception to the recognition and disclosure of deferred taxes arising from the jurisdictional implementation of the Pillar Two model rules; and y Disclosure requirements for affected entities to help users of the financial statements better understand an entity's exposure to Pillar Two income taxes arising from that legislation, particularly before its effective date. The mandatory temporary exception – the use of which is required to be disclosed – applies immediately. The remaining disclosure requirements apply for annual reporting periods beginning on or after 1 April 2025, but not for any interim periods ending on or before 31st March 2026. The amendments had no impact on the Company's financial statements as the Company is not in scope of the Pillar Two model rules.

As at 31 March 2026					
Borrowings	348.41	-	-	-	348.41
Trade Payables	1,014.45	-	-	-	1,014.45
Other financial liabilities	410.94	-	-	-	410.94
Total	**1,773.80**	**-**	**-**	**-**	**1,773.80**
As at 31 March 2025					
Borrowings	1,122.40	-	-	-	1,122.40
Other financial liabilities	15.39	-	-	-	15.39
Total	**1,137.79**	**-**	**-**	**-**	**1,137.79**

The entire borrowings and interest thereon is due to the holding company. Other liabilities of the Company will be repaid with the support of the holding company and cash and bank balances.

b) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of change in market price. The Company does not have any foreign currency exposure and hence is not subject to foreign currency risks. The entire borrowing of the Company is from its holding company and is at a fixed rate. Hence the Company is not subject to any interest rate risks. Further, the Company does not have any investments, trade receivables or any other receivable and hence is not subject to other price risks, interest risk and credit risk.

(c) Financial instrument measured at Amortised Cost

The carrying amount of financial assets and financial liabilities measured at amortized cost in the financial statement are a reasonable approximation of their fair values since the Company does not anticipate that the carrying amounts would be significantly different than the values that be eventually received or paid.

28: Capital Management

The Company is wholly owned by its parent company and it does not have any external borrowings and is not subject to any externally imposed capital requirements.

29: Previous year figures has been rearranged, regrouped and reclassified to make them confirmatory with current year figures.

30: Employee benefits:

(a) Defined Contribution Plans
The Company contributes to the Government managed provident and pension fund for all qualifying employees.

Contribution to provident and other funds of Rs. Nil (31 March 2025 : Nil) is recognized as an expense and included in "Contribution to provident and other funds" in Statement of Profit and Loss.

(b) Defined Benefit Plans:
The Company has defined benefit plan for payment of gratuity to all qualifying employees. It is governed by the Payment of Gratuity Act, 1972. Under this Act, an employee who has completed five years of service is entitled to the specified benefit. The level of benefits provided depends on the employee's length of service and salary at retirement age. The Company's defined benefit plan is unfunded.

There are no other post retirement benefits provided by the Company.

The actuarial valuation of the present value of the defined benefit obligation were carried out as at 31 March 2026 by M/s Charan Gupta Consultants Pvt Ltd, Fellow of the Institute of the Actuaries of India. The present value of the defined benefit obligation, the related current service cost and past service cost, were measured using the projected unit credit method.

(Rs in Lakhs)

Movement in the present value of the defined benefit obligation are as follows :	Gratuity	Gratuity
Particulars	**As at 31 March 2026**	**As at 31 March 2025**
Opening defined benefit obligation	-	-
Acquisition adjustment In		
Interest cost	-	-
Current service cost	12.89	-
Benefits paid	-	-
Actuarial (gain) / loss on obligations	-	-
Present value of obligation as at the year end	**12.89**	-

The principal assumptions used for the purposes of the actuarial valuations of gratuity are as follows:

Particulars	As at 31 March 2026	As at 31 March 2025
Discount rate (per annum)	7.29%	NA
Expected rate of salary increase	8.00%	NA
Employee attrition rate	5%	NA
Mortality	100% of IALM (2012-14)	NA

Estimates of future salary increases considered in actuarial valuation take account of inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

These plans typically expose the Company to actuarial risks such as interest rate risk and salary risk.
a) Interest risk: a decrease in the bond interest rate will increase the plan liability.
b) Salary risk: the present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, a variation in the expected rate of salary increase of the plan participants will change the plan liability.

Sensitivity analysis

Significant actuarial assumptions for the determination of defined obligation are discount rate and expected salary increase. The sensitivity analysis below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

Particulars	Gratuity As at 31 March 2026	Gratuity As at 31 March 2025
Impact on present value of defined benefit obligation:		
If discount rate is increased by 0.50%	(1.04)	NA
If discount rate is decreased by 0.50%	1.16	NA
If salary escalation rate is increased by 0.50%	1.14	NA
If salary escalation rate is decreased by 0.50%	(1.03)	NA

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumption would occur in isolation of one another as some of the assumptions may be correlated. Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet.

Discounted Expected outflow in future years (as provided in actuarial report)

(Rs in Lakhs)

Particulars	**As at 31 March 2026**	**As at 31 March 2025**
	Gratuity	**Gratuity**
Expected outflow in 1st Year	0.02	-
Expected outflow in 2nd Year	0.03	-
Expected outflow in 3rd Year	0.04	-
Expected outflow in 4th Year	0.09	-
Expected outflow in 5th Year	0.57	-
Expected outflow in 6th year	0.54	-
Expected outflow 7th year onwards	11.61	-

The average duration of the defined benefit plan obligation at the year ended 31 March 2026 reporting period is 15.00 years.

(c) Other long term employment benefits:
Annual leave & Short term leave

The liability towards compensated absences (annual and short term leave) for the year ended 31 March 2026 based on actuarial valuation carried out by using projected accrued benefit method resulted in increase in liability by ₹ 19.99 lakhs, which is included in the employee benefits in the Statement of Profit and Loss.

The principal assumptions used for the purposes of the actuarial valuations of compensated absences are as follows:

Particulars	**As at 31 March 2026**	**As at 31 March 2025**
Discount rate	7.29%	NA
Expected rate of salary increase	8.00%	NA
Employee attrition rate	5.00%	NA
Mortality rate	100 % of IALM (2012 - 14)	NA
